## New Fraud Detection Layer

We added new fraud detection layers to the arsenal of tools protecting your accounts. To protect your money, a quick step in Online Banking will be added for high risk action activities.

Now, when you send money, update personal information, or access sensitive account features, you'll be prompted to enter a One-Time Passcode (OTP) sent to you by text or phone call.

**Remember! Never Share Your OTP:** TexasBank will never call, text, or email asking for your OTP. You'll only enter it directly in Online Banking. If anyone calls or texts you to request it, even if they claim to be from TexasBank, it's a scam. Hang up or delete the message and contact us immediately at **833.987.2265**.

This fast, simple step helps stop fraud before it starts—keeping your account and your peace of mind protected.

**The Bottom Line:** One small step adds a powerful layer of security.
